ORGANIC GEOCHEMISTRY

The Official Journal of the European Association of Organic Geochemists

Editors-in-Chief:

Dr Earl W. Baker, College of Science, Florida Atlantic University, Boca Raton, FL 33431, U.S.A.

Dr A. G. Douglas, Newcastle Research Group (NRG) in Fossil Fuels and Environmental Geochemistry, Drummond Building, University of Newcastle-upon-Tyne, Newcastle-upon-Tyne NE1 7RU, U.K.

Associate Editors

Dr J. Connan, Elf-Aquitaine, CST Jean Feger, L2 109, Avenue Larribau, 64018 Pau Cedex, France
Dr P. A. Cranwell, Freshwater Biological Association, Windermere Laboratory, The Ferry House, Ambleside, Cumbria LA22 0LP, U.K.
Dr A. N. Fuex, Shell Development Co., P.O. Box 481, Houston, TX 77001, U.S.A.
Dr Patrick Hatcher, Pennsylvania State University, 209 Academic Projects Building, University Park, PA 16802, U.S.A.
Dr Alain Y. Huc, Institut Français du Pétrole, BP 311 Rueil Malmaison 92506, France
Professor S. R. Larter, Newcastle Research Group, Drummond Building, University of Newcastle-upon-Tyne, Newcastle-upon-Tyne NE1 7RU, U.K.
Dr G. W. M. Lijmbach, Shell Internationale Petroleum Maatschappi, E&P Division (EXP/34), P.O. Box 162, 2501 AN The Hague, The Netherlands
Dr Susan Palmer, AMOCO Production Company Research Center, 4502 East 41st Street, P.O. Box 3385, Tulsa, OK 74102, U.S.A.
Dr Kenneth E. Peters, Chevron Overseas Petroleum Inc., 6001 Bollinger Canyon Rd, P.O. Box 5046, San Ramon, CA 94583-0946, U.S.A.
Dr M. Radke, ICH-5, KFA Jülich GmbH, P.O. Box 1913, D-5170 Jülich, Fed. Rep. Germany
Dr Bernd R. T. Simoneit, College of Oceanography, Oregon State University, Corvallis, OR 97331, U.S.A.
Dr John Volkman, C.S.I.R.O. Division of Oceanography, GPO Box 1538, Hobart, Tasmania 7001, Australia

Editorial Board

Dr Pierre Albrecht, Université Louis Pasteur de Strasbourg, Institut de Chimie, 1 rue Blaise Pascal, B.P. 296/R8, 67008 Strasbourg, France
Dr Malvin Bjorøy, Geolab Nor, Geochemical Laboratories of Norway A/S, Hornebergveien 5, P.O. Box 1581, 7001 Trondheim, Norway
Dr George E. Claypool, E & P Services Inc., P.O. Box 650232, Dallas, TX 75265-0232, U.S.A.
Dr J. M. Hayes, Biogeochemical Laboratories, Geology Building, Indiana University, Bloomington, IN 47405-5101, U.S.A.
Dr John Hunt, Woods Hole Oceanographic Institution, Woods Hole, MA 02543, U.S.A.
Professor Raphael Ikan, Department of Organic Chemistry, Laboratory of Natural Products and Organic Geochemistry, The Hebrew University of Jerusalem, Jerusalem, Israel 91904
Dr Ryoshi Ishiwatari, Tokyo Metropolitan University, Fukazawa 2-1-1, Setagaya-ku, Tokyo 158, Japan
Dr Fu Jiamo, National Laboratory of Organic Geochemistry, Chinese Academy of Sciences, P.O. Box 1131, Wushan, Guangzhou 510640, People's Republic of China
Dr Keith Kvenvolden, U.S. Geological Survey, 345 Middlefield Rd, Meno Park, CA 94025, U.S.A.
Professor Detlev Leythaeuser, ICH-5, KFA Jülich GmbH, P.O. Box 1913, D-5170 Jülich, Fed. Rep. Germany
Dr Philip A. Meyers, Department of Geological Sciences, University of Michigan, C.C. Little Building, Ann Arbor, MI 48109, U.S.A.
Dr Alexander A. Petrov, Institute of Geology and Exploitation of Combustible Fuels (IGiRGI), Oil Ministry, Academy of Sciences, P.O. Box 117312, 50 Fersman Str., Moscow, U.S.S.R.
Dr Otto P. Strausz, Department of Chemistry, University of Alberta, Edmonton, Alberta, Canada T6G 2G2
Dr Michael Wilson, C.S.I.R.O. Division of Coal Technology, P.O. Box 136, North Ryde, NSW 2113, Australia

Members of the Board of EAOG

Professor G. Eglinton—*Chairman*
Professor S. R. Larter—*Secretary* (Drummond Building, University of Newcastle-upon-Tyne, Newcastle-upon-Tyne NE1 7RU, U.K.), Dr J. Connan, Dr A. Y. Huc, Dr J. W. de Leeuw, Professor D. Leythaeuser, Dr G. W. M. Lijmbach, Professor L. Mattavelli and Dr K. Øygard

Publishing Office: Pergamon Press plc, Pergamon House, Bampfylde Street, Exeter EX1 2AH, England [*Tel.* Exeter (0392) 51558; *Fax* (0392) 425370]

Subscription and Advertising Offices: *North America*: Pergamon Press Inc., 395 Saw Mill River Road, Elmsford, NY 10523, U.S.A. *Rest of the World*: Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW, England [*Tel.* Oxford (0865) 794141]

Subscription Rates: Annual institutional subscription rate (1992): £655 (US$1050). Two-year institutional rate (1992/93): £1244.50 (US$1995). Sterling prices are definitive. U.S. dollar prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice. Subscription rates for Japan are available on request.
Supplied to members of the European Association of Organic Geochemists as part of their membership dues. Members of the following societies can also purchase subscriptions at a concessional rate. Details of these rates are available on request.

Geochemical Society
Organic Geochemistry Division of the Geochemical Society
Meteoritical Society
International Association of Geochemistry and Cosmochemistry
American Chemical Society
American Association of Petroleum Geologists

Back issues: Back issues of all previously published volumes, in both hard copy and on microform are available direct from Pergamon Press offices.

Number 1

William A. Gregory, Elizabeth W. Chinn, Roger Sassen and George F. Hart — 1 — Fluorescent microscopy of particulate organic matter: Sparta Formation and Wilcox Group, South Central Louisiana

Lucinda Brothers, Michael H. Engel and Bernd M. Krooss — 11 — The effects of fluid flow through porous media on the distribution of organic compounds in a synthetic crude oil

S. D. Killops — 25 — Novel aromatic hydrocarbons of probable bacterial origin in a Jurassic lacustrine sequence

Anne L. Bates, Patrick G. Hatcher, Harry E. Lerch III, C. Blaine Cecil, Sandra G. Neuzil and Supardi — 37 — Studies of a peatified angiosperm log cross section from Indonesia by nuclear magnetic resonance spectroscopy and analytical pyrolysis

K. E. Peters and J. M. Moldowan — 47 — Effects of source, thermal maturity, and biodegradation on the distribution and isomerization of homohopanes in petroleum

Alfred A. Christy, Olav M. Kvalheim, Kjell Øygard, Birger Dahl and Terje V. Karstang — 63 — Maturity of kerogen and asphaltenes determined by partial-least-squares (PLS) calibration and target projection of diffuse reflectance Fourier transformed infrared spectra

Mahlon C. Kennicutt II, James M. Brooks and Thomas J. McDonald — 75 — Origins of hydrocarbons in Bering Sea sediments—I. Aliphatic hydrocarbons and fluorescence

Riwandi Sihombing, W. David Johnson, Michael A. Wilson, Merike Johnson, Anthony M. Vassallo and David Alderdice — 85 — Origins of humus variation. Effects of leaching and seasonal flooding on aromaticity

Brian D. Beato, Richard A. Yost, Gary J. Van Berkel, Royston H. Filby and J. Martin E. Quirke — 93 — The Henryville bed of the New Albany shale—III: Tandem mass spectrometric analyses of geoporphyrins from the bitumen and kerogen

Letter to the Editor
Michael A. Wilson, Anthony M. Vassallo, Dawit Gizachew and Eric Lafargue — 107 — A high resolution solid state nuclear magnetic resonance study of some coaly source rocks from the Brent group (North Sea)

Number 2

James C. Hower and John A. Clendening — 113 — Introduction

Arthur D. Cohen and Scott A. Stout — 115 — Dedication

John B. Hayes — 117 — Porosity evolution of sandstones related to vitrinite reflectance

Dennis R. Prezbindowski and J. Bryan Tapp	131	Dynamics of fluid inclusion alteration in sedimentary rocks: a review and discussion
Rick C. Tobin	143	Diagenesis, thermal maturation and burial history of the Upper Cambrian Bonneterre dolomite, southeastern Missouri; an interpretation of thermal history from petrographic and fluid inclusion evidence
Charles T. Helfrich and James C. Hower	153	Palynologic and petrographic variation in the Pond Creek coal bed, Pike County, Kentucky
James C. Hower and Susan M. Rimmer	161	Coal rank trends in the Central Appalachian coalfield: Virginia, West Virginia, and Kentucky
Martin Reinhardt	175	Vitrinite reflectance, illite crystallinity and tectonics: results from the Northern Apennines (Italy)
Brian J. Cardott	185	Organic petrology of epi-impsonite at Page, Oklahoma, U.S.A.
Michael A. Kruge, John C. Crelling, Edwin J. Hippo and Stephen R. Palmer	193	Aspects of sporinite chemistry
Arthur D. Cohen and Fredrick J. Rich	205	Preliminary trends in reflectance and maceral analysis of Upper Cretaceous Menefee and Crevasse Canyon coals in the San Juan Basin of New Mexico
A. C. Cook and N. R. Sherwood	211	Classification of oil shales, coals and other organic-rich rocks
A. R. Cameron	223	Regional patterns of reflectance in lignites of the Ravenscrag Formation, Saskatchewan, Canada
Ronald C. Surdam, Donald B. MacGowan and Thomas L. Dunn	243	Predictive models for sandstone diagenesis
Deborah W. Kuehn and Alan Davis	255	The effects of coalification and paleoenvironment on aliphatic and aromatic CH contents in the Lower Kittanning coal seam
		Abstracts
John A. Clendening	263	An introduction to the relationship between temperature and hydrocarbon phases
Susan M. Rimmer	265	Vitrinite reflectance as an indicator of organic maturation—an overview
John A. Clendening	267	Interpretation of vitrinite data and its application to petroleum exploration
Francis T. C. Ting†	269	Review of vitrinite reflectance techniques and applications
Rick C. Tobin	271	Pore system evolution vs paleotemperature in carbonate rocks; a predictable relationship?

Roger Sassen, R. D. Snelling and Ezat Heydari — 273 — Destruction of hydrocarbons and generation of non-hydrocarbon gases in deep carbonate reservoirs of the Smackover Formation

J. T. Senftle, K. L. Yordy, L. S. Barron and J. C. Crelling — 275 — Whole rock and isolated kerogen characterization studies: observations of sample type preparations upon petrographic and chemical characterization of New Albany Shale

Announcement — I

Number 3

Stanislav I. Golyshev, Natalia A. Verkhovskaya, Valentina N. Burkova and Elena Ya. Matis — 277 — Stable carbon isotopes in source-bed organic matter of West and East Siberia

Patrick G. Hatcher and Michael A. Wilson — 293 — The effect of sample hydration on ^{13}C CPMAS NMR spectra of fulvic acids

M. B. Yunker, W. J. Cretney, B. R. Fowler, R. W. Macdonald, F. A. McLaughlin and B. G. Whitehouse — 301 — On the distribution of dissolved hydrocarbons in natural water

Jentaie Shiea, Simon C. Brassell and David M. Ward — 309 — Comparative analysis of extractable lipids in hot spring microbial mats and their component photosynthetic bacteria

M. Bakr, M. Akiyama and Y. Sanada — 321 — *In situ* high temperature ESR measurements for kerogen maturation

A. Saliot, J. C. Marty, P. Scribe, M. A. Sicre, T. C. Viets, J. W. de Leeuw, P. A. Schenck and J. J. Boon — 329 — Characterization of particulate organic matter in Mediterranean sea-surface films and underlying water by flash pyrolysis and gas chromatographic analyses

A. Amblès, J. C. Jacquesy, P. Jambu, J. Joffre and R. Maggi-Churin — 341 — Polar lipid fraction in soil: a kerogen-like matter

Arnd Wilhelms, Steve R. Larter and Detlev Leythaeuser — 351 — Influence of bitumen-2 on Rock-Eval pyrolysis

M. F. M. Guadalupe, V. A. Castello Branco and J. C. Schmid — 355 — Isolation of sulfides in oils

R. A. Noble, C. H. Wu and C. D. Atkinson — 363 — Petroleum generation and migration from Talang Akar coals and shales offshore N.W. Java, Indonesia

T. G. Powell, C. J. Boreham, M. Smyth, N. Russell and A. C. Cook	375	Petroleum source rock assessment in non-marine sequences: pyrolysis and petrographic analysis of Australian coals and carbonaceous shales
Book Reviews		
Raphael Ikan	395	"Humic Substances II: In Search for Structure" edited by M. H. B. Hayes, P. MacCarthy, R. L. Malcolm and R. S. Swift
Mark D. Jackson	395	"Microcomputer Applications in Geology, II" edited by J. Thomas Hanley and Daniel F. Merriam
Announcements	I	

Number 4

Richard D. Harvey, John C. Crelling and Dennis D. Kaegi	397	Introduction
Neely H. Bostick, William J. Betterton, Hal J. Gluskoter and M. Nazrul Islam	399	Petrography of Permian "Gondwana" coals from boreholes in northwestern Bangladesh, based on semiautomated reflectance scanning
H. B. Lo	415	How well can artificial coalification simulate the natural maturation trend?
David C. Glick and Alan Davis	421	Operation and composition of the Penn State Coal Sample Bank and Data Base
James C. Hower, Robert A. Keogh and Darrell N. Taulbee	431	Petrology of liquefaction residues: maceral concentrates from a Pond Creek durain, eastern Kentucky
Charles H. Harrison	439	Electron microprobe analysis of coal macerals
Michael S. Rollins, Arthur D. Cohen, Alan M. Bailey and James R. Durig	451	Organic chemical and petrographic changes induced by early-stage artificial coalification of peats
Réjane Baranger, Luis Martinez, Jean-Luc Pittion and Jacques Pouleau	467	A new calibration procedure for fluorescence measurements of sedimentary organic matter
T. A. Abrajano, B. D. Holt and G. R. Dyrkacz	477	Stable isotope geochemistry of organic matter alteration in Animikie Basin sediments within the thermal aureole of the Duluth Complex
Mark A. Pasley, William A. Gregory and George F. Hart	483	Organic matter variations in transgressive and regressive shales
B. Pradier, P. Bertrand, L. Martinez and F. Laggoun-Defarge	511	Fluorescence of organic matter and thermal maturity assessment
Ilham Demir and Richard D. Harvey	525	Variation of organic sulfur in macerals of selected Illinois Basin coals
Ralph J. Gray	535	Some petrographic applications to coal, coke and carbons

D. N. Taulbee, J. C. Hower and S. F. Greb — 557 — Examination of micrinite concentrates from the Cannel City coal bed of eastern Kentucky: proposed mechanism of formation

Don M. Triplehorn, Ronald W. Stanton, Leslie F. Ruppert and Sharon S. Crowley — 567 — Volcanic ash dispersed in the Wyodak–Anderson coal bed, Powder River Basin, Wyoming

Reviewers for 1990 — 577

Announcement — I

Number 5

C. Costa Neto — 579 — The effect of pressure on geochemical maturation: theoretical considerations

J. V. Ross, R. M. Bustin and J. N. Rouzaud — 585 — Graphitization of high rank coals—the role of shear strain: experimental considerations

Sylvie Derenne, Claude Largeau and Eliette Casadevall — 597 — Occurrence of tightly bound isoprenoid acids in an algal, resistant biomacromolecule: possible geochemical implications

Dag A. Karlsen and Steve R. Larter — 603 — Analysis of petroleum fractions by TLC-FID: applications to petroleum reservoir description

Florent Dominé — 619 — High pressure pyrolysis of *n*-hexane, 2,4-dimethylpentane and 1-phenylbutane. Is pressure an important geochemical parameter?

James A. Rice and Patrick MacCarthy — 635 — Statistical evaluation of the elemental composition of humic substances

A. G. Requejo, John S. Brown, Paul D. Boehm and T. C. Sauer — 649 — Lignin geochemistry of North American coastal and continental shelf sediments

B. J. Keely and J. R. Maxwell — 663 — Structural characterization of the major chlorins in a Recent sediment

Number 6

Editorial — v

Introduction — 671

John M. Hunt — 673 — Generation of gas and oil from coal and other terrestrial organic matter

Martin G. Fowler, Fariborz Goodarzi, Thomas Gentzis and Paul W. Brooks — 681 — Hydrocarbon potential of Middle and Upper Devonian coals from Melville Island, Arctic Canada

W. Pickel and G. K. E. Götz — 695 — Investigations on the petroleum generation potential of bituminous coals from the Saar region

Patrick Landais	705	Assessment of coal potential evolution by experimental simulation of natural coalification
B. J. Katz, P. A. Kelley, R. A. Royle and T. Jorjorian	711	Hydrocarbon products of coals as revealed by pyrolysis–gas chromatography
C. J. Boreham and T. G. Powell	723	Variation in pyrolysate composition of sediments from the Jurassic Walloon Coal Measures, eastern Australia as a function of thermal maturation
J. L. Clayton, D. D. Rice and G. E. Michael	735	Oil-generating coals of the San Juan Basin, New Mexico and Colorado, U.S.A.
Lloyd R. Snowdon	743	Oil from Type III organic matter: resinite revisited
S. C. Teerman and R. J. Hwang	749	Evaluation of the liquid hydrocarbon potential of coal by artificial maturation techniques
P. K. Mukhopadhyay, P. G. Hatcher and J. H. Calder	765	Hydrocarbon generation from deltaic and intermontane fluviodeltaic coal and coaly shale from the Tertiary of Texas and Carboniferous of Nova Scotia
Joseph A. Curiale and Rui Lin	785	Tertiary deltaic and lacustrine organic facies: comparison of biomarker and kerogen distributions
Martin G. Fowler, Thomas Gentzis, Fariborz Goodarzi and Anthony E. Foscolos	805	The petroleum potential of some Tertiary lignites from northern Greece as determined using pyrolysis and organic petrological techniques
Huang Difan, Zhang Dajiang, Li Jinchao and Huang Xiaoming	827	Hydrocarbon genesis of Jurassic coal measures in the Turpan Basin, China
Hans W. Hagemann and Walter Pickel	839	Characteristics of Upper Cretaceous coals from Enugu (Nigeria) related to bitumen generation and mobilization
Ganjavar Khavari Khorasani and Johan K. Michelsen	849	Geological and laboratory evidence for early generation of large amounts of liquid hydrocarbons from suberinite and subereous components
Qin Kuangzong, Chen Deyu and Li Zhanguang	865	A new method to estimate the oil and gas potentials of coals and kerogens by solid state ^{13}C NMR spectroscopy
	873	Papers presented at the *199th American Chemical Society National Meeting*
	875	Reviewers for this issue

General Papers

W. G. Prowse and J. R. Maxwell	877	High molecular weight chlorins in a lacustrine shale
C. J. Clayton	887	Effect of maturity on carbon isotope ratios of oils and condensates

G. Rieley, R. J. Collier, D. M. Jones and G. Eglinton — 901 The biogeochemistry of Ellesmere Lake, U.K.—I: source correlation of leaf wax inputs to the sedimentary lipid record

Letter to the Editor

Ph. Blanc and P. Albrecht — 913 Parameters of "macromaturity" (PMM): novel rank and type related indices from chemical degradation of macromolecular network of coals

ORGANIC GEOCHEMISTRY

The Official Journal of the European Association of Organic Geochemists

Aims and Scope

Organic Geochemistry was established in response to the need for a specialized medium for the publication of research in this highly interdisciplinary field. At present papers concerned with interrelated fields such as organic chemistry, inorganic chemistry, geology, mineralogy, biogeochemistry, oceanography, hydrology, atmospherics and extraterrestrial subjects are published in many scattered journals. It is intended that *Organic Geochemistry* serve as a medium for the publication of reports on all phases of geochemistry in which organic substances play a role. Interpretation of this policy will be liberal to permit the broadest possible exchange of ideas. Among others, papers related to crude oils, coals, natural gas and shales and their associated substances will be welcome, as will reports of studies of the roles of organic substances in the geochemical cycles of various elements. Reports of paleontological and coal petrographic studies will be considered favorably if they are geochemically oriented. Letters to the Editors, relevant news and book reviews will be published. Individual issues of *Organic Geochemistry* may be devoted to papers presented at Symposia.

Instructions to Contributors

1. All manuscripts and correspondence should be addressed to Dr Earl W. Baker, College of Science, Florida Atlantic University, Boca Raton, FL 33431, U.S.A. or Dr A. G. Douglas, Newcastle Research Group (NRG) in Fossil Fuels and Environmental Geochemistry, Drummond Building, University of Newcastle-upon-Tyne, Newcastle-upon-Tyne NE1 7RU, U.K. Manuscripts will be reviewed and considered for publication on the basis of originality of contribution.

2. In consideration of the international character of the journal, manuscripts may be submitted in any of three languages: English, French or German. Each manuscript should be accompanied by an abstract of up to 100 words. Three copies of each manuscript, typed and double-spaced, must be submitted. Only those papers that have not been published elsewhere, wholly or in part, can be considered for publication. Where possible, the **Fax number of the corresponding author** should be supplied with the manuscript, for use by the Publisher.

3. In conjunction with the abstract, include 5–7 key words.

4. Footnotes may be used only on the first page of the manuscript.

5. Figures and tables should be prepared on individual pages and accompanied by legends as follows:

   Fig. 4. Methane and phosphate distribution with depth in Hudson River sediments.

   Table 1. Stable ion isotope composition of the plants, *Uca pugnax*, and surface soils collected in nine areas of a Georgia salt marsh

   Legends for figures and tables should appear on separate accompanying pages. All figures and tables should be in final form ready for printing. Tables will be reproduced by photo-offset means directly from the authors' typed manuscript. Large or long tables should be typed on continuing sheets. Table headings should be typed on separate sheets but identifying numbers should be placed on the upper right-hand corner of each sheet of tabular-material. Original typed tables are required. It will be the author's responsibility to prepare his tables in accordance with this procedure as no facilities exist at the Editorial Office for retyping. In case of difficulty please consult the Photoreprographic Unit of your institution.

6. References should appear in the text as (Sommer, 1974), or "as noted by Sommer (1974)".

   All references should be listed alphabetically at the end of the manuscript in the following style:

   Bailey N. J. L., Krause H. R., Evans C. R. and Rogers M. A. (1973) Alteration of crude oil by waters and bacteria—evidence from geothermal and isotope studies. *Bull. Am. Assoc. Pet. Geol.* **57,** 1276–1290.

   Goldschmidt V. M. (1935) Occurrence of rare elements in coal ashes. In *Progress in Coal Science* (Edited by Bangham D. H.), Vol. 1, pp. 238–247. Interscience, New York.

   Hood D. W. (Ed.) (1971) *Impingement of Man on the Oceans.* Wiley, New York.

   Names of journals should be abbreviated according to *Chemical Abstracts.*

7. Page proofs will be sent to the author (or the first-mentioned author in a paper of multiple authorship) for checking. **Corrections to the proofs must be restricted to printer's errors.** Any substantial alterations other than these may be charged to the author. Authors are particularly requested to return their corrected proofs as quickly as possible in order to facilitate rapid publication. Please note that **authors are urged to check their proofs carefully before return, since late corrections cannot be guaranteed for inclusion in the printed journal.** Reprints and copies of the issue (at a specially reduced rate) can be ordered on the form which will accompany the proofs. These should be returned to: Pergamon Press plc, Pergamon House, Bampfylde Street, Exeter EX1 2AH, England.

8. The original manuscript and diagrams will be discarded one month after publication unless the Publisher is requested (on submission of the manuscript) to return original material to the author.
